

showering and bathing from...

AQUALISA

There's not many places where you can get away from it all, so if like most of us you're juggling a busy lifestyle with family, friends and work commitments, the chances are that your opportunities for rest and relaxation are relatively few. Which is where the bathroom and great showering and bathing come in.

And, we believe that whilst the time you spend showering and bathing might be short, it should be nothing less than totally sensational.

So, take a break and have a look at our great British showering and bathing solutions.

AQUALISA

...we're
passionate
about showering
and bathing...

From design to despatch, we're proud of what we do and how we do it. At Aqualisa, we design and manufacture innovative showering and bathing solutions that are renowned for their power, performance and reliability.

Founded over 30 years ago, Aqualisa has always pioneered groundbreaking, original bathroom product design. In 1977, Aqualisa's thermostatic technology made headlines. Developed especially with the nuances of the domestic plumbing system in mind, it changed British bathrooms forever.

But time doesn't stand still and today, Aqualisa continues to be at the forefront of cutting edge showering and bathing with its extensive range of Digital showers and bath fills. Since introducing the concept of digital technology in 2001, digital showers and recently, digital bath fills have been embraced by the bathroom industry, installer and consumer alike.

But don't just take our word for it. To us, innovation is part of our culture and Aqualisa's revolutionary products have collected a range of awards including those from the Design Business Association, Homes & Gardens Magazine, CORGI and most recently, a Queen's Award for Enterprise: Innovation – recognising Digital and cementing Aqualisa's reputation as true innovators.

Praise for products that we are rightly very proud of.

Aqualisa technologies

At Aqualisa, we get the basics right. Our showers are renowned for original design and outstanding power shower performance, but we also focus upon safety, reliability, quality and durability.

We also know what you want in the bathroom, and have developed a digital bath system to complement our Quartz Digital shower range.

Of course, looks are important too – but beyond the striking exteriors is state-of-the-art technology, which optimises flow rate and ensures fantastic performance on often unsatisfactory British plumbing systems.

Built to last, Aqualisa shower and bath systems are hand assembled and rigorously tested. And, our service doesn't stop once the box has been opened. Our customer service team are always available for handy hints, plus we offer some of the best guarantees around.

Digital

Since its launch back in 2001, Digital has heralded a new generation of showering technology.

Digital features include a one touch control with an illuminated display that shows when the perfect temperature is reached, as well as the options of a remote control and the first totally wireless and batteryless remote control, both of which can be positioned outside of the bathroom. Utilising a revolutionary remote processor, these showers and baths are thermostatic, versatile and incredibly easy to install.

Thermo

Back in 1977, Aqualisa's ground breaking bi-metallic shower cartridge made a splash on the BBC's 'Tomorrow's World'. This tried and trusted technology is still the benchmark today for many mixer showers.

Reliable and resilient to wear and tear, all our mixer showers are super safe, easy to install and provide a powerful, temperature controlled flow of water.

Electric

The ideal solution for simple showering, an Electric shower offers an endless, economical flow of water. And, unlike other showering systems, an Electric shower won't use stored hot water.

Dependable, safe and perfect for smaller or additional shower rooms, Aqualisa's Electric showers are BEAB approved and can be installed in hours.

A close-up photograph of a woman with dark hair, smiling broadly with her eyes closed, as water sprays over her face from a showerhead. The water is captured in motion, creating a dynamic and refreshing scene. The woman's skin is wet and glistening, and her expression is one of pure joy and relaxation.

Axis® Digital

Fed up with trying to balance hot and cold flows of water? It won't happen with Axis Digital. Just one touch will start and stop the shower.

High Pressure/Combi and Gravity Pumped showers are available – so you can make the most of your water heating system.

Keep an eye on the flashing lights – when they hold steady, it's time to start showering.

Sleek, sophisticated, and with a luxurious metal finish, it's difficult to imagine how showering could get any smarter than Axis Digital. Urbane and refined, Axis Digital is the perfect partner for modern living in the fast lane.

Controlled by a remotely situated processor, which thermostatically blends hot and cold water with spot-on accuracy and featuring lights that let you know exactly when it's time to jump in, Axis Digital takes showering to another level of intelligence.

Choose from four striking shower head variants, all with Aqualisa's clear flow, anti-scaling technology.

Small showering area? Choose a flush or ceiling fixed shower head.

Need more versatility? How about a height adjustable design?

Adjustable head with multimode handset.

Life's rushed enough without waiting for your shower to warm up. Opt for a remote control and turn your Axis Digital on without even going into the bathroom.

Axis Digital's flush fitting concealed control lets you make the most of your showering area, whatever its size. The all metal control creates a sleek and streamlined effect that is perfect for everything from en suites to wet rooms.

Axis Digital showers offer maximum design flexibility. So, whether your shower is for an en suite or wet room, you can be sure of a Digital solution to suit. Installation is easy too. The processor, which blends the hot and cold water is sited away from the shower, so there's no need to damage walls or tiling.

Check page 54 & 55 for product codes, prices & dimensions.

Select from wall fixed, ceiling fixed, flush or adjustable height shower heads – all finished in easy-to-clean chrome and with Aqualisa's anti-scaling, clear flow technology.

Axis Thermo showers are suitable for virtually all types of plumbing system. Consider adding a pump if you need to boost your shower's performance.

Mix and match Axis Thermo controls and shower heads to create your ideal shower. The adjustable height shower head now has a multimode handset, offering a choice of 3 spray patterns.

Check page 54 for product codes, prices & dimensions.

Axis[®]

Thermo

Based upon Aqualisa's original, high performance shower system, Axis Thermo is a head turning, contemporary interpretation of a classically proportioned, concealed shower control.

Beyond the looks, there's solid, quality engineering designed to endure the test of time and for peace of mind, a pre-set, maximum temperature.

Aqualisa's renowned Thermo design ensures water temperature remains consistent – regardless of other showers or taps being used at the same time.*

* When installed as per manufacturer's instructions.

Quartz Digital now features the 105mm Harmony shower head, with four impressive spray patterns, water saving 'eco' spray, easy clean nozzles and anti-twist hose connection.

Straightforward and easy to use, one simple touch switches Quartz Digital on and off.

Quartz®

Digital Concealed

Simply push the button, wait a moment for the illuminated display to become steady... and step in. Quartz Digital sparked a generation of intelligent showers when it was launched – and it's just as cutting edge today.

Controlled by a processor that speeds installation, eliminates damage to walls and blends hot and cold water with thermostatic precision. Quartz Digital delivers a total showering solution.

Neat and compact, the concealed Quartz Digital is an especially good choice for smaller showering enclosures, where space is at a premium.

An unobtrusive wall plate can be fitted behind the shower's control to conceal any damage caused by your previous shower.

An optional remote control lets you turn your shower on without reaching into the enclosure.

Quartz Digital remote control

Quartz Digital wireless remote (can be fitted with or without backplate)

Choose from a fixed or adjustable head and for the ultimate indulgence, why not add body jets?

Check pages 56 & 57 for product codes, prices & dimensions.

Quartz®

Digital Exposed

Easy to install and even easier to operate, Quartz Digital can be fitted swiftly with little disruption to your bathroom.

It's sometimes a challenge persuading younger children to shower. Quartz Digital makes wash-time fun, fast and safe for busy families thanks to its combination of simple one touch controls, unique safety features and superb power shower performance.

Quartz Digital sums up showering simplicity at its best.

High Pressure/Combi and Gravity Pumped showers are available, making Quartz Digital ideal for the majority of water heating systems. As an added bonus, you'll have the choice of even more oomph,* courtesy of the 'boost' button included with all shower systems.

*Actual boost flow rate when fitted on combi boiler systems dependent on combi boiler performance capability.

Thanks to its clever exposed design, there's no need for installation to cause damage to décor or tiling. The processor, which blends the water is situated away from the shower so you can make the most of your showering space too.

A simple, push button control is all it takes to get Quartz Digital up and running. Best watch that flashing blue light on the controller, too. When it becomes permanently illuminated, the shower is ready. The perfect choice for all ages.

The wireless remote control, suitable for Quartz Digital exposed and concealed, is easy to use and can be installed in minutes. Can be fitted with or without backplate.

new design
see page 56

Quartz Digital wireless remote
(can be fitted with or without backplate)

Quartz Digital showers now feature the 105mm Harmony shower head with four impressive spray patterns including water saving 'eco' spray.

Check pages 56 & 57 for product codes, prices & dimensions.

You can also team a Quartz Digital concealed shower with a Quartz Bath accessory kit (comprising a bath overflow filler and diverter valve), and switch between shower and bath with a simple twist of the diverter valve – a perfect over bath solution.

Quartz Digital Bath is available as High Pressure/Combi or Gravity Pumped.

Check page 57 for product codes, prices & dimensions.

Quartz® Digital Bath

Sleek contemporary looks, a clutter free bathroom, no more fiddling with taps or checking that the temperature's just right – Quartz Bath, the latest addition to the Quartz Collection, makes bathtime a breeze!

Like its shower sibling, the illuminated LED display on the controller shows you when the water has reached temperature. Just press the button, wait till the lights stop flashing and pop in the plug with the neat lever on the filler. The temperature perfect water is dispensed through the concealed spout in the chrome bath overflow filler.

For extra comfort and convenience, Aqualisa Quartz Digital bathing technology will automatically stop the water flowing if there is insufficient hot water available.

Perfect bathing, every time.

Quartz Digital
remote control

Quartz Digital
wireless remote
(can be fitted with
or without backplate)

For total luxury, why not choose a remote control and run your bath from afar.

Quartz[®]

Thermo

Up-to-the-minute, cosmopolitan design teamed with Aqualisa's renowned Thermo showering technology. That's the new Quartz Thermo.

Combining performance, power and all importantly, practicality, Quartz Thermo is suitable for nearly all types of plumbing systems and offers a reliable, temperature controlled shower – even when water is being used elsewhere in the house.

Quartz Thermo is safe, too. The shower will automatically shut down if either the hot or cold water supplies fail, and there's a built-in temperature limit of 45°C.

Quartz Digital now features the 105mm Harmony shower head. Choose an adjustable height or fixed shower head and enjoy the choice of four impressive spray patterns, water saving 'eco' spray, easy clean nozzles and anti-twist hose connection.

Check page 56 for product codes, prices & dimensions.

Robust, yet tactile, Quartz Thermo features non-slip, lather friendly lever controls.

Need to give your gravity water system a boost? Then why not consider adding a suitable pump to your Quartz Thermo?

Quartz®

Electric

The Quartz Electric's simple and compact design offers effective efficient showering.

The unique over temperature protection system protects the user from selecting dangerously high temperatures making it ideal for use by all the family. And now you can enjoy the benefits of 5 luxurious, well defined spray patterns courtesy of the new Harmony Electric shower head.

Quartz Electric is available with three performance ratings – 8.5kW, 9.5kW and for extra power 10.5kW.

Quartz Electric comes with delayed shutdown that switches the shower off gradually to flush out hot water. This is an added safety feature for the next user and reduces limescale around the heating element, extending the life of the shower.

red dot design award
winner 2008

Quartz Electric is available in graphite/chrome, chrome and white/chrome.

Check page 57 for product codes, prices & dimensions.

Visage[®] Digital

Visage Digital is the perfect introduction to digital showering and, once you've experienced the benefits we're confident you won't want to go back.

Visage Digital is controlled by our clever processor box, which ensures perfect temperatures and a safe, one touch showering experience every time. There's also an optional eco setting, so if you've got your eye on water consumption, you can still shower with a clear conscience.

Visage Digital couldn't be easier to install. In fact, choose an exposed design and your new shower could be up and running in as little as two hours, with no damage to your existing tiles or décor.

Why not treat yourself to the latest addition to the Visage range – with a remote control, you'll never have to reach into the shower to switch on again!

Just one push is all it takes to get your Visage Digital shower up and running. Then, simply keep an eye on the illuminated display. When the green light turns from flashing to steady, you'll know it's up to temperature and time to shower.

High Pressure/Combi and Gravity Pumped showers are available, making Visage Digital ideal for the majority of water systems.

Check page 58 for product codes, prices & dimensions.

Dual

Easy to use and easy on the eye, Dual is a thermostatic multi-tasking shower, which really does do it all.

Designed with the modern family in mind, Dual offers the benefit of two great showers in one. Enjoy a truly versatile showering experience by switching easily between the luxurious drencher head and the fully height adjustable, multimode handset.

From family bathroom to compact cloakroom, Dual's range of flexible, carefully considered features are guaranteed to please. A drencher style, main shower head makes for luxurious, indulgent showering, whilst, for speed or a quick splash, it's hard to beat the secondary shower head. With Dual's cleverly designed integrated diverter, it's easy to switch between the two, as well.

Spray patterns

Inner

Outer

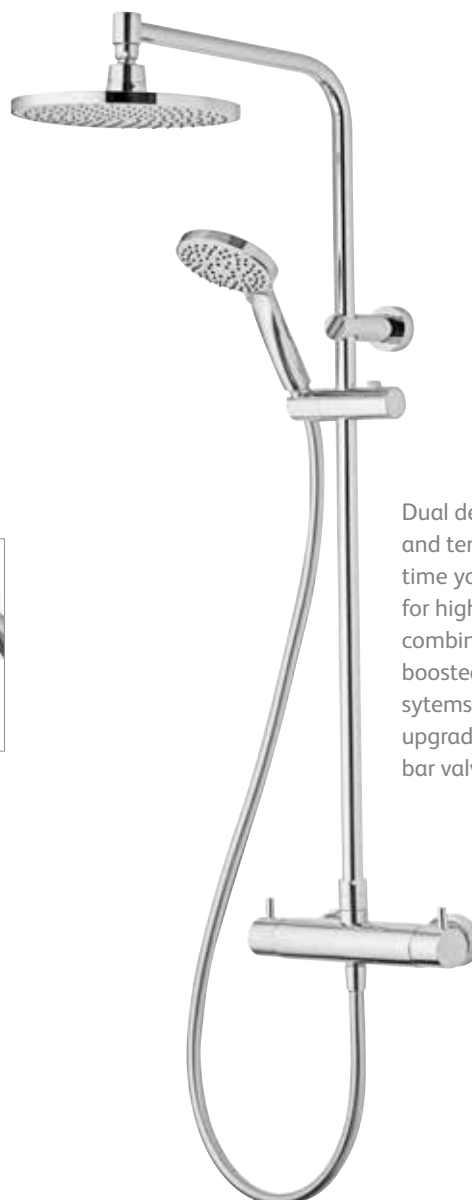

Combined

The adjustable handset features rub clean nozzles and an easy click spray plate delivering three well defined spray patterns.

The stylish 220mm drencher head delivers an indulgent deluge of water, plus it's easy to clean too, courtesy of the rub clean nozzles.

Dual delivers perfect flow and temperatures every time you shower. Suitable for high pressure, combination boiler and boosted gravity water systems, Dual is an ideal upgrade from an existing bar valve shower.

Check page 59 for product codes, prices & dimensions.

Midas 100[®]

Smart, modern looks and great performance makes the Midas 100 thermostatic shower and bath shower mixer range the perfect choice for the family bathroom.

Finished in hard wearing, durable chrome it comes complete with height adjustable 90mm Harmony shower head. Enjoy the choice of four impressive spray patterns including an 'eco' spray setting for up to 25% water saving.

The Midas 100 thermostatic mixer shower is now suitable for low pressure, high pressure and combination boiler systems, delivering an impressive flow rate, plus for the water conscious, a range of flow regulators are available.

If it's a bath shower mixer that your bathroom requires, Midas 100 is suitable for both bath or wall mounting and comes complete with deck mounting fixing brackets – so the choice is yours.

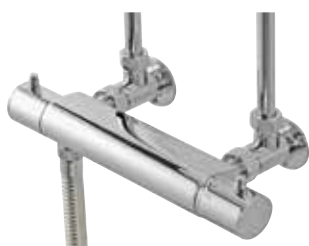

And you're always in control with the easy to use temperature selector, maximum temperature override button and flow control knob that come as standard with Midas 100. So, you get a superb, temperature perfect, reliable shower or bath every time!

Midas 100 thermostatic shower and bath shower mixer range comes in hard wearing durable chrome.

Check page 59 for product codes, prices & dimensions.

All Midas showers offer the option of exposed pipe fittings that enable the products to be fitted to rising or falling exposed pipework.

The bar valve fixing kit is an ideal solution for easy surface sited installation.

Installation is made easier with the unique and innovative easy fit fixing bracket and exposed pipe fitting accessories.

Suitable for high pressure and combination boiler systems, the co-ordinating Midas basin monobloc tap, complete with pop-up waste is finished to the highest standard and will complete the look of your bathroom.

Suitable for high pressure and combination boiler systems, the co-ordinating Midas basin monobloc tap, complete with pop-up waste is finished to the highest standard and will complete the look of your bathroom.

Midas 200 thermostatic shower and bath shower mixer range has luxury metal build and construction, and comes complete with a 90mm Harmony shower head and contemporary style rail.

Check page 58 for product codes, prices & dimensions.

Midas 200[®]

Luxurious, sleek and contemporary, Midas 200 is the perfect indulgence for the bathroom. A flawless chrome finish and a choice of shower or bath shower mixer means no matter what your bathroom demands, you will always be reassured of an impressive, high performance bathing experience.

With Midas 200 you're always in control with a temperature override button, a flow control knob and a luxurious chrome 90mm shower head, delivering four impressive spray patterns including an 'eco' spray setting, which will reduce your water usage by up to 25%.

If you would like to reduce your water consumption even further, the high pressure version comes with a clever eco stop flow control, designed to deliver 50% of the shower's maximum flow. However, if it's flow that you're looking for, the low pressure variant can deliver up to double the flow of some of its contemporaries.

The bar valve fixing kit is an ideal solution for easy surface sited installation.

Installation is made easier with the unique and innovative easy fit fixing bracket.

Midas 300[®]

Introducing luxury to the hugely successful Midas range. The Midas 300 enjoys all the benefits of the Midas 200 but with a stylish and contemporary multimode shower head with adjustable height rail system and smooth chrome hose.

With its stunning good looks and sensational contemporary styling, Midas 300 will be a “wow” in any bathroom.

Available as dedicated HP/Combi and Gravity showers and HP/Combi bath shower mixers, Midas 300 provides impressive shower performance even with low pressure systems.

Offering a host of considerate details the Midas 300 contemporary shower head comes with a clickable spray plate control, a thoughtful anti-twist hose connection and delivers three luxurious, well defined spray patterns.

Check page 58 & 59 for product codes, prices & dimensions.

Midas 300 thermostatic shower and bath shower mixer range with a stylish and contemporary shower head.

Designed to allow total flexibility, the Aquavalve 609 Thermo is available with a fixed or an adjustable height shower head.

Both shower heads feature Aqualisa's anti-scaling technology and for that extra wake up call, why not consider a Turbostream shower head?

Aquavalve 609[®]

Thermo

Even active lives need to restore their equilibrium occasionally. So, whether it's revival at the end of a busy day or a wake up call in the morning, the Aquavalve 609 Thermo will relax or rejuvenate you – ready for the next challenge.

Designed and built around Aqualisa's tried and trusted thermostatic technology, the Aquavalve 609 Thermo offers the very best of performance-driven yet practical showering.

There's no need to worry about unsteady temperatures or scalding water with the Aquavalve 609 Thermo.

Thanks to Aqualisa's unique thermostatic control, hot and cold flows of water are mixed accurately and, should either hot or cold supplies fail, the shower will immediately shut down.

Choose between an adjustable or fixed shower head and booster pump options.

Check page 62 for product codes, prices & dimensions.

Aquavalve 700[®]

Thermo

Indulge in a little showering luxury with the brass bodied Aquavalve 700 Thermo.

Available with an anti-scale concealed or exposed control, the Aquavalve 700 Thermo marries a quality, solid brass shower valve with Aqualisa's renowned and reliable thermostatic engineering. A shower built to last.

A choice of scale resistant shower heads – including the option of the powerful Turbostream – means the Aquavalve 700 Thermo is one of the most versatile showers you can choose.

Perfectly accurate temperatures are assured, along with automatic shut down should the hot or cold water supplies fail.

Heighten the sense of 'luxe' living with the addition of body jets. Ideal for recreating that spa or wet room feel, body jets can be used with your Aquavalve 700 Thermo or separately, via a diverter.

Remember though, that you might need a pump to get the best from your body jets.

Choose from concealed or exposed shower controls and fixed or adjustable shower heads.

Check pages 60 & 61 for product codes, prices & dimensions.

Aquastream[®]

Thermo

For get up and go showering, it's difficult to beat the Aquastream Thermo.

Boasting true power shower performance, the Aquastream Thermo is an all-in-one, thermostatic shower that, behind those ergonomic lines, cleverly conceals a booster pump. Perfect if space is in short supply.

And, as the Aquastream Thermo is surface mounted, there's likely to be less damage to tiling.

Two power options allow Aquastream Thermo to make the most of your plumbing system. Select from a flow rate of 10 litres or 18 litres per minute.* Then just wait for the deluge...

*Based upon 1m head of water.

Aquastream Thermo comes ready to install, complete with an integral pump, rail and 90mm Harmony shower head, delivering four impressive spray patterns, including an 'eco' spray setting for up to 25% water saving.

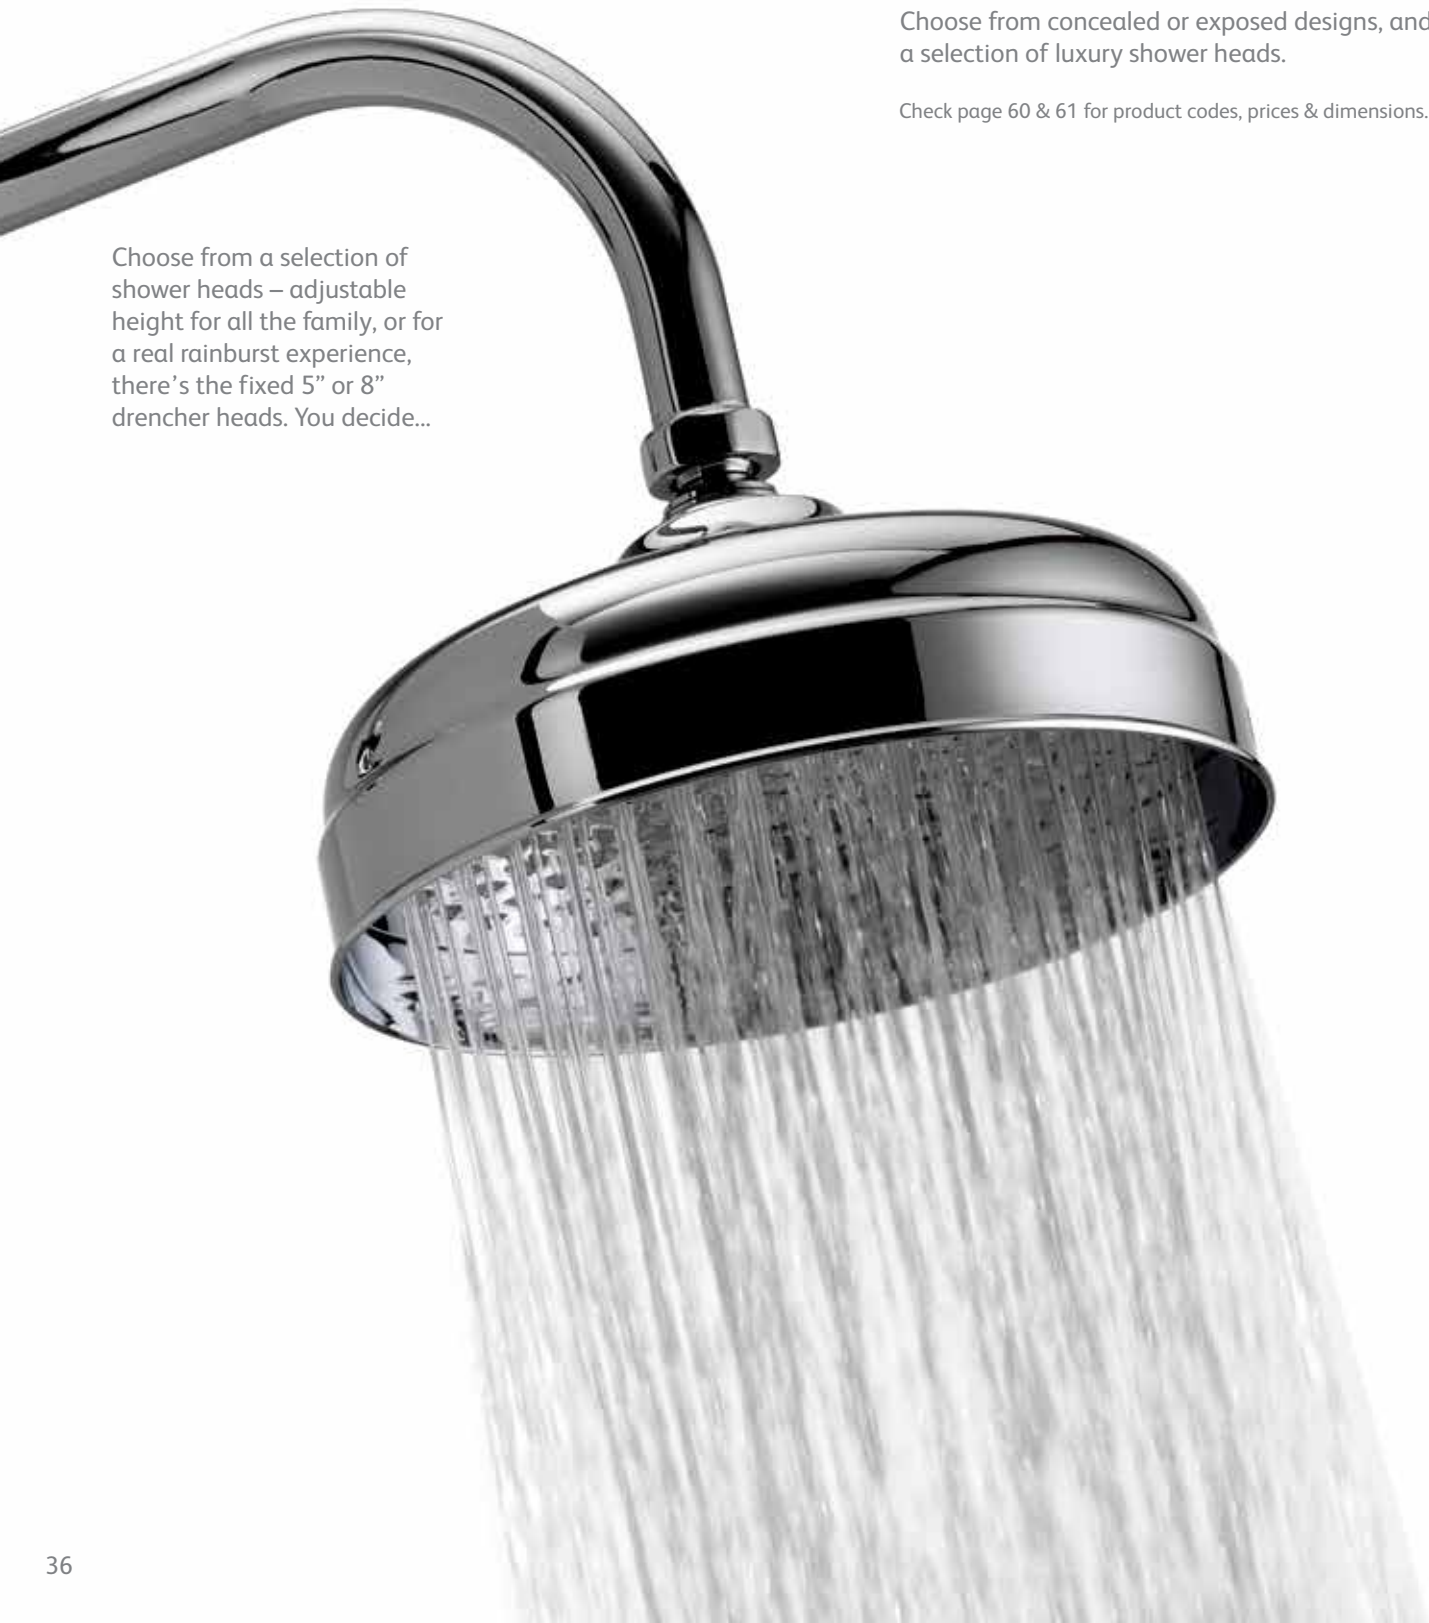

Check page 61 for product codes, prices & dimensions.

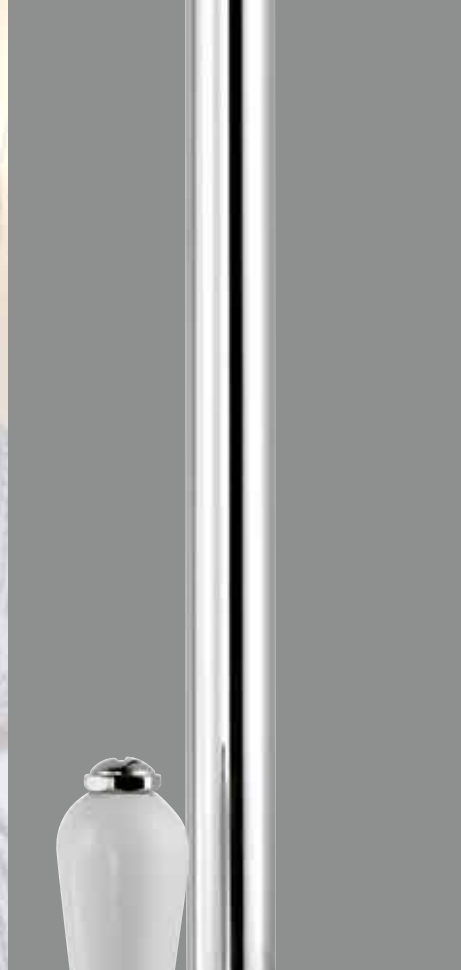

Choose from concealed or exposed designs, and a selection of luxury shower heads.

Check page 60 & 61 for product codes, prices & dimensions.

Choose from a selection of shower heads – adjustable height for all the family, or for a real rainburst experience, there's the fixed 5" or 8" drencher heads. You decide...

Aquatique® Thermo

Classically styled and capable of delivering a waterfall, the Aquatique Thermo is a statement shower that not only looks good but also offers Aqualisa's flawless thermostatic showering technology.

Concealed or exposed controls are available and whilst the design might be inspired by another era, there's nothing old-fashioned about the Aquatique Thermo's performance.

Crafted from solid brass, the Aquatique Thermo offers safe and powerful showering.

Peace of mind is assured too; should the hot or cold water supplies fail, the shower will shut down straight away.

There's a pre-set temperature control for safe showering and as the Aquarian Thermo is fitted directly onto the wall, installation is easy, quick and causes little disruption.

Smooth, curved on/off temperature controls make the Aquarian Thermo a pleasure to use – even with slippery hands.

Aquarian® Thermo

Sculpted and sleek with more than a hint of retro styling, Aquarian Thermo is an easy to use, easy to install, thermostatically controlled shower that is available with a host of styling and design options.

Just like Aqualisa's other Thermo designs, the Aquarian Thermo benefits from sophisticated temperature control and offers reassuring safety features.

Select between a fixed shower head or for greater flexibility, an adjustable shower head. Varispray or Turbostream shower heads are available. Both shower heads feature Aqualisa's clear flow, anti-scaling technology.

Check page 63 for product codes, prices & dimensions.

The Aquamixa Thermo is the ideal way to convert bath taps to a thermostatic shower.

Quick and easy to install, the thermostatic shower blends hot and cold water perfectly, whilst the manual bath fill provides the solution when only a bath will do.

Aquamixa Thermo is available in chrome with a choice of shower heads.

Check page 62 for product codes, prices & dimensions.

Aquamixa Thermo comes with the option of an adjustable or fixed shower head. Both feature Aqualisa's clear flow, anti-scaling technology – ensuring your Aquamixa Thermo delivers a downpour rather than a drizzle.

Aquamixa[®]

Thermo

Family showering at its friendliest, the Aquamixa Thermo wraps showering and bathing up into a simple and easy to install package.

Designed with ultimate versatility in mind, the Aquamixa Thermo is an over the bath thermostatic shower combined with all the benefits of a manual bath fill.

Aquastyle[®]

Electric

Simple, reliable and economical, Aquastyle Electric provides showering with uncomplicated functionality.

The one push start/stop control, easy glide temperature selector and key safety features make Aquastyle Electric a great family showering solution. Simply switch on and start showering.

With safety in mind, Aquastyle Electric features a clever, over temperature protection system, designed to prevent the selection of dangerously high temperatures, making this shower ideal for all the family.

Aquastyle Electric provides instant hot water whenever you need it. Its clever safety feature means all hot water is flushed out of the system after every shower, so you won't get a 'hot shock' when you switch on again. Plus, it prevents limescale build-up, which can be damaging to the shower's element.

Aquastyle Electric is available in three engine sizes – 8.5kW, 9.5kW and 10.5kW.

Check page 63 for product codes, prices & dimensions.

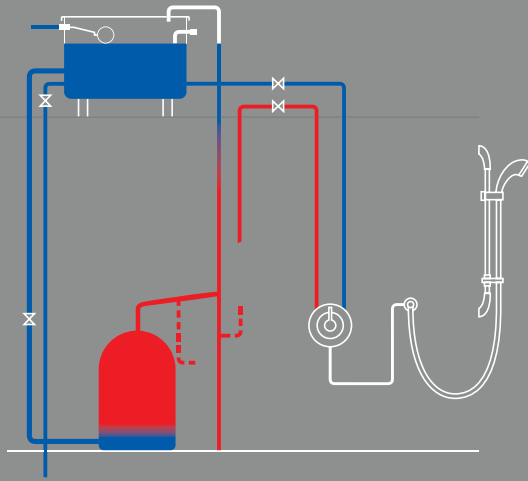

The shower head features Aqualisa's patented 'Y' shaped 'Active Nozzles' which expand and contract according to flow to provide defined spray patterns throughout the year.

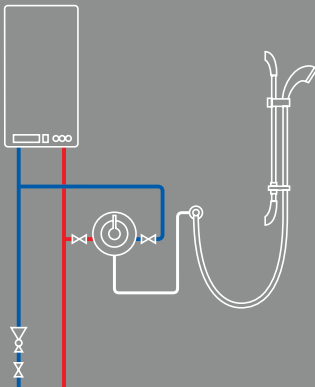

Gravity system

A cold water tank usually located in the roof space, and a hot water cylinder, frequently in the airing cupboard.

Combination boiler system

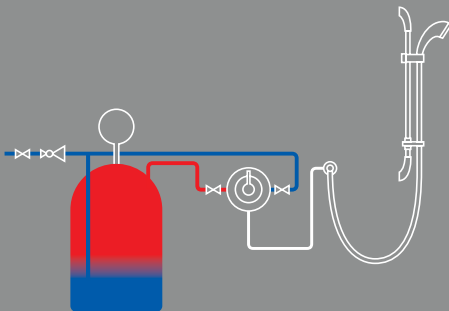

These systems heat your water as you use it and usually consist of a boiler attached to a wall, often in the kitchen.

Mains fed system

(High pressure system or unvented hot water system)

A high-pressure cylinder of water, heated by a boiler or immersion heater, usually providing high volumes of water.

Planning your shower or bath

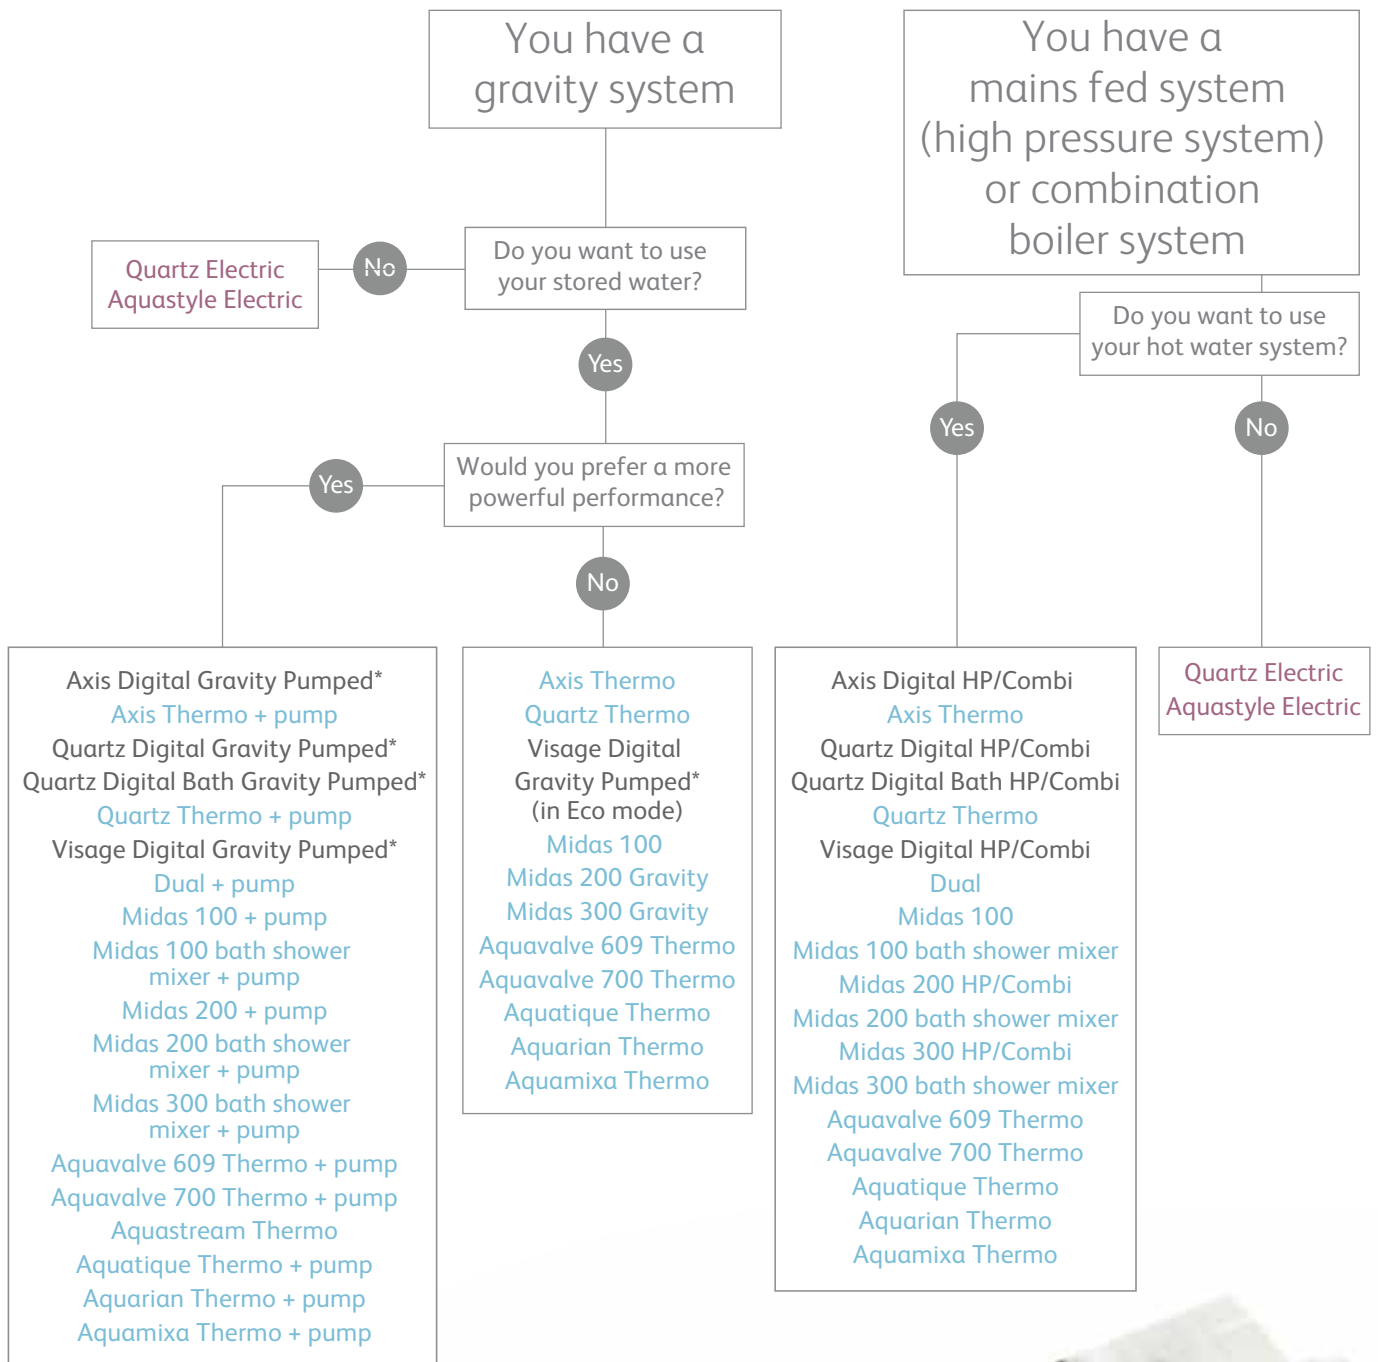

At Aqualisa we pride ourselves on making things simple. And, although selecting the right shower or bath filler for you and your family can seem a daunting process, it needn't be too confusing. Just take a moment to follow the advice below. It really couldn't be easier.

Firstly, identify the water system in your home. The diagrams and descriptions on the left should help you do this.

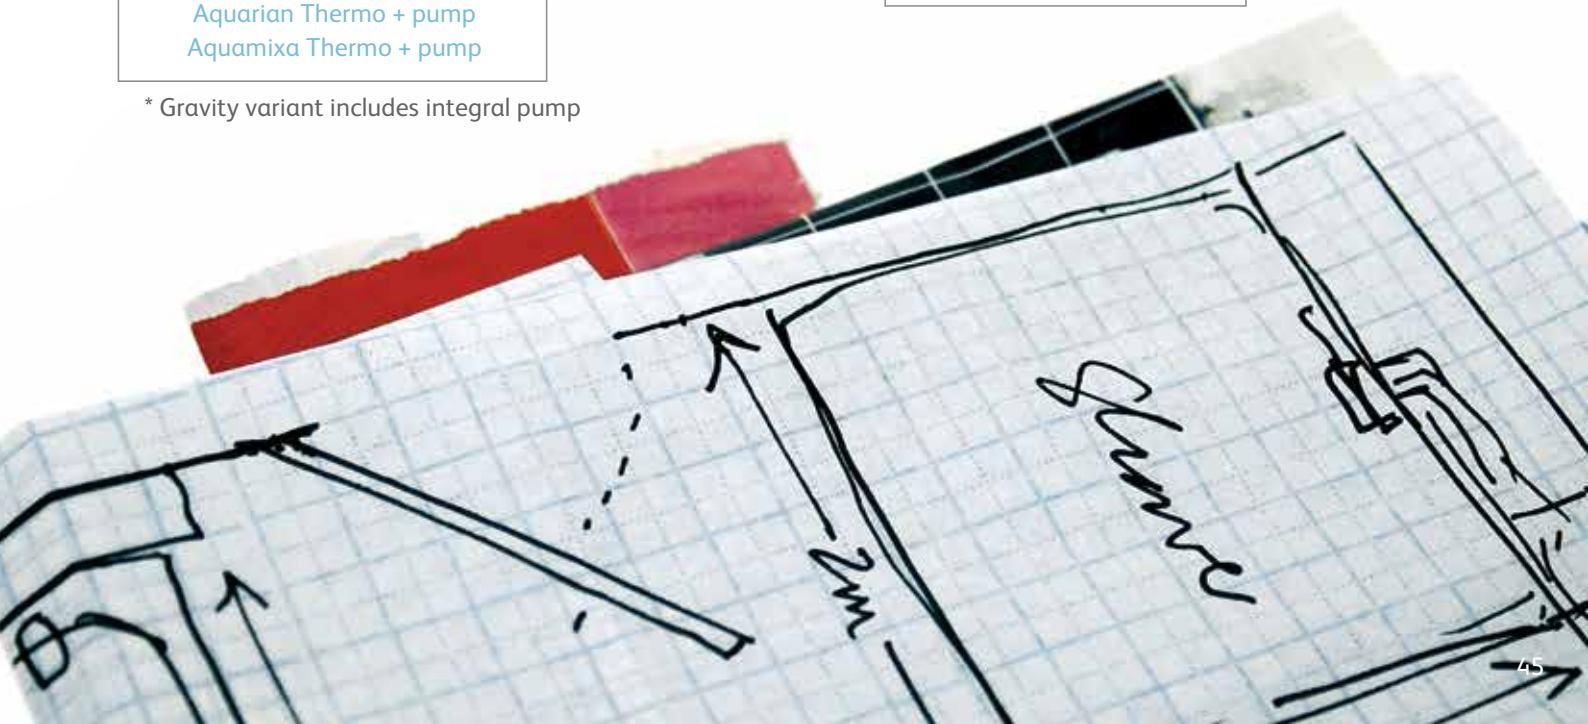

Secondly, follow the chart on the right to choose the shower or bath filler suitable for both you and your water system.

If you are in any doubt about your water system or choice of product, consult a qualified installer or contact the Aqualisa customer helpline on 01959 560010.

Showering or bathing to suit your system

* Gravity variant includes integral pump

Understanding Digital showering and bathing

Aqualisa's award-winning digital technology has spearheaded a new generation of showers and baths.

With intelligent features exclusive to Aqualisa, digital showers and baths couldn't be simpler to use. Plus, with some installations taking just two hours to complete and minimal disruption, digital will get you showering and bathing double-quick, too!

No matter what member of the Aqualisa Digital product family you choose, you can be sure of nothing less than a truly outstanding performance. Spot-on, thermostatic temperatures, reliable flow, easy one touch controls and an illuminated display that lets you know when it's time to shower or bathe.

These, plus other optional features such as an Eco setting and a remote control that lets you get your shower or bath up and running from outside the bathroom, all come courtesy of the advanced processor at the heart of every Aqualisa Digital shower or bath fill. So whatever your style preference, bathroom requirements or budget, you can be sure, that thanks to digital, there will be an Aqualisa shower or bath fill to suit.

to digital processor

Put off installing a new shower or bath fill because of the disruption and work involved? Don't be. Aqualisa's award-winning digital technology makes it easy.

So how does it work? Central to every Aqualisa Digital shower or bath fill is a sophisticated processor – the digital product's nerve centre. Unlike a conventional shower valve, the processor can be situated up to 10 metres away from the showering area. A slim data cable connects the processor to the shower or bath control.

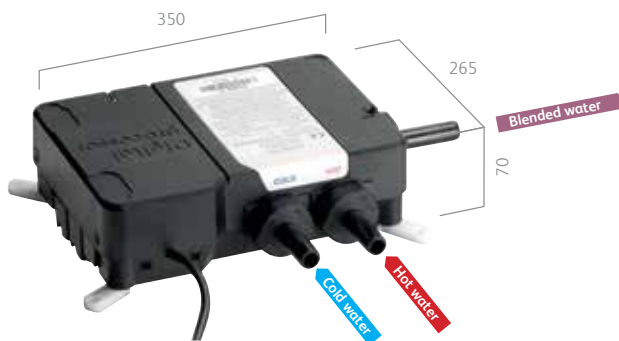

This unique configuration has many advantages – the digital control can be positioned wherever is convenient and because there is no need to conceal pipework or a valve, installation can be completed in as little as two hours, with minimal damage to décor, tiling and walls. Hot and cold water flows into the processor and is mixed with perfect precision. Every processor has a factory pre-set maximum temperature of 45°C* – making it safe for everyone. Once blended, the water then leaves the processor and travels to the shower head or bath filler. What could be simpler?

Eco setting

The Aqualisa digital processor has a unique eco mode designed to conserve water usage without compromising performance. Simply, set the processor to 'Eco Mode' during installation and enjoy all the benefits that digital showering has to offer, whilst doing your bit for the environment too.

HP/Combi digital processor

This compact digital processor is for use with a combination boiler or mains fed system (high pressure or unvented hot water system).

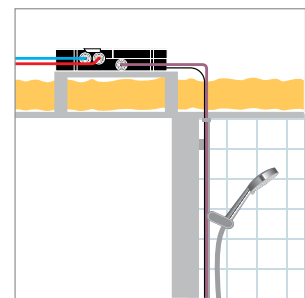

Gravity Pumped digital processor

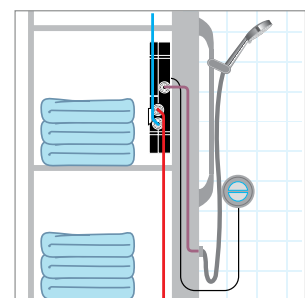

This compact digital processor is for use with gravity fed water systems. It integrates a pump to provide extra power.

Understanding Thermo showers

Especially designed with the nuances of the British plumbing system in mind, our thermostatic technology is a tried and trusted favourite with busy households everywhere. No more irregular temperatures, no need to worry about a tap – or even another shower – being used elsewhere, just reliable, straightforward showers every time.

The secret of Aqualisa's Thermo range showering technology is an ingenious bi-metallic coil. Made from two different types of stainless steel, the coil reacts almost immediately to changes in water temperature. So, as hot and cold water flows into the Thermo shower, the bi-metallic coil is constantly adjusting and re-adjusting its expansion to ensure your shower delivers nothing less or more than your perfect temperature.

Even better, the coil resists the build-up of limescale and as a result, enables more water to flow through the shower head.

Suitable for the majority of UK domestic plumbing systems – including gravity-fed, combination boiler and mains fed – Thermo showers are as hardworking and durable today as when they were introduced by Aqualisa. Of course, we've refined them a little along the way – but essentially, it's the same groundbreaking technology that caused a splash over thirty years ago. And why change such proven performance?

What's inside? Aqualisa's unique bi-metallic coil provides all our Thermo showers with temperature safe water.

Mach[®]

Shower pumps

The powerful Mach range of pumps are made exclusively for Aqualisa by Stuart Turner and have been designed to provide just the right amount of oomph to your shower, no matter what your requirements are.

Maintenance free and guaranteed to enhance the flow of your shower, Mach pumps are fully WRAS and CE approved. Regeneratively, rather than centrifugally operative, they're also much more efficient and less likely to struggle with annoying air locks.

Do you need a pump?

Used with gravity fed water heating systems, the right pump can make an enormous difference to your showering experience and will allow you to add extras such as body jets.

If you've selected one of Aqualisa's Thermo showers and your existing shower barely manages a drizzle, you'll probably need a pump. Refer to the simple flow chart on page 45 to check which Thermo showers you can use with a pump.

Don't forget!

It's essential that you choose the right pump. Not just for you, your family and your new shower – but for your plumbing system, too. A pump will increase the volume of water your shower can deliver per minute and it's important to check your water tank will have enough storage capacity to cope. Vital during the morning rush hour when everyone wants a hot shower.

Don't overlook where all that extra water will go to either. You'll need to ensure your shower tray's waste is sufficiently capable of quickly and effectively draining water away.

Mach 120 pump

This pump will give your shower a moderate boost and is suitable for use with Varispray, Turbostream or Harmony shower heads.

Mach 250 pump

This pump will give your shower a medium boost and is suitable for use with two shower heads or a single shower head and two body jets.

Mach 340 pump

This pump will give your shower a high boost and is suitable for use with two shower heads and two body jets or a single shower head and four body jets.

Shower heads

Harmony shower heads

Combining contemporary looks with great functionality, Harmony shower heads from Aqualisa are now featured across our ranges – old and new.

Designed to deliver an uncompromising showering experience from both high and low pressure water systems, Harmony is packed with thoughtful, user friendly features. Harmony's versatility teams it with showers as diverse as Quartz Digital, Quartz Thermo, Midas 200 and with some clever tweaks, Quartz Electric. Plus, with a Harmony shower head our Midas 100 now performs superbly on low as well as high pressure water systems.

Optimising your shower

The cleverly designed spray patterns deliver a concentrated and fuller spray for a satisfying showering experience, even with low pressure water systems.

Water saving

Harmony's 'eco' spray setting, on mixer showers, is capable of delivering up to 25% water saving. Without compromising the showering experience.

Easy clean nozzles

Harmony's rub clean nozzles are designed to make cleaning and limescale removal easy, reducing the need for chemical de-scaling, and maintaining shower performance.

Anti-twist hose connection

A thoughtfully designed anti-twist mechanism allows the shower head to swivel independently from the hose to avoid twisting, maintaining performance and extending the life of the hose.

Harmony fixed head

Harmony adjustable head

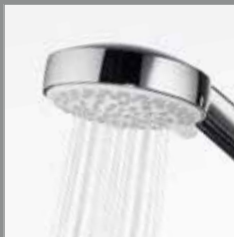

Spray patterns

With an easy to use, clickable spray plate control, four impressive spray patterns on mixers and five on Quartz Electric, Harmony shower heads let you choose a setting to suit your mood.

Varispray and Turbostream shower heads

Aqualisa's Varispray and Turbostream shower heads are available with Aquavalve 609 Thermo, Aquavalve 700 Thermo, Aquarian Thermo and Aquamixa Thermo.

Depending upon your choice of shower, you can select either a fixed or an adjustable shower head. Opt for a fixed design for a neat, unobtrusive shower that makes the most of available showering space or, for complete showering versatility, choose a family-friendly adjustable design – great for both you and the kids.

Sprays to suit your mood

Aqualisa's stylish Varispray shower head offers multiple spray patterns, so whether it's an early morning wake-up call or a relaxing after work wind-down, you'll be sure to find one to suit.

The Turbostream shower head is the ideal choice if you are looking for a little more energy and invigoration and have a mains fed system or gravity system and pump. This shower head delivers 3 fantastic spray modes – enjoy a invigorating cascade of water, an indulgent champagne function (where water is mixed with air), or a pulsating water massage to help you to ease away the stresses of the day.

Varispray and Turbostream shower heads come complete with Aqualisa's anti-scaling, clear flow technology. Simply rub clean the flexible nozzles on the shower head to remove any limescale build up ensuring well defined spray patterns every time.

The rotating outer ring allows you to change spray functions as and when you wish, so that you experience the perfect spray to suit your mood.

A range of adjustable and fixed shower heads are available in a variety of colour finishes, offering total flexibility as well as a great solution for wetrooms or smaller showering enclosures.
