## ILUX™

Driven by Aqualisa's intelligent digital technology. Inspired by your natural desire for the ultimate in showering and bathing luxury. This is ilux Digital. A shower and bathing system so intelligent, so intuitive that it seems to read your mind. It allows you to pre-set your personal preferences, remembering them precisely and synchronising with your life perfectly, reflecting your personal style in every sleekly designed detail.

With its contemporary looks and stylish lighting display, ilux allows you to choose the exact showering or bathing experience you desire. From the flow and temperature of your shower to the depth and temperature of your bath. For the ultimate indulgence, ilux can be controlled remotely and wirelessly at the touch of a button, so you can create a showering or bathing experience for every mood, every occasion. Just your perfectly personalised experience delivered effortlessly, courtesy of ilux Digital.

## ILUX™ SHOWER

ilux allows you to choose the shower to suit your mood at the touch of a button. From the perfect flow to the precise temperature – ilux's intelligent lighting display will even tell you when your perfect shower is ready. Then step under a stunning shower head from the Options range and be enveloped in a luxurious water experience. Designed by you, delivered by ilux.

Best of all, ilux remembers your pre-set personal showering preferences, no matter who used the shower last. And before you enjoy all that ilux has to offer, you can start your shower, without getting wet, with the neat wireless remote control from outside the enclosure.

If you wish to save water there is a thoughtful Pause button to allow you to interrupt the flow to lather hair or shave. An additional eco setting means you can be water efficient while still enjoying a truly sensational shower. And the ilux controls are 'cool to touch' so comfort and safety are guaranteed. The ilux Shower range includes divert and single outlet shower systems for the ultimate lifestyle choice.

See pages 42 and 43 for configuration details, codes and prices.

See pages 43 and 44 for configuration details, codes and prices.

## ILUX™ BATH

With an ilux Digital Bath you can choose exactly how you want your bath to be. You can create three personalised bathing experiences and with ilux's wireless remote control, you can even fill the bath from the comfort of your bedroom. Simply press one button and ilux will run your perfect bath, so you can enjoy a few more minutes in bed.

Make the most of your long soak with ilux Digital's Hot Top Up. At the touch of a button you can extend your luxury bathing time. If you choose the divert system you can team your ilux Bath with the retractable hand shower from the Options range to complete the luxurious experience. It will slide effortlessly and elegantly out of its housing and smoothly retract back in, making bathtime, 'me time'.

For family peace of mind the ilux Child Lock safety feature prevents little hands from filling the bath without permission. And with no taps in sight, your bathroom will look stylish and contemporary.

See pages 45, 46, 47 and 48 for configuration details, codes and prices.

## HIQU™

The elegance of HiQu Digital's contemporary design combines with the intelligence of Aqualisa's award-winning digital technology to deliver a showering or bathing experience that is as intuitive as it is indulgent.

Simply press the beautifully finished control and HiQu begins to blend and deliver water to the exact temperature and flow that you wish. Cocooning you in the water experience of your dreams. Embraced and enveloped in total luxury.

HiQu's sophisticated looks are completed by the comprehensive Options range of shower heads and accessories, allowing you to suit your individual needs, indulge your personal tastes, and create your own perfect bathroom to the last handpicked detail.

# HIQU™ SHOWER

From the first moment you experience the sheer sophistication of starting your perfect shower with a single touch, you'll never want to shower any other way.

The smart lighting display rotates and intuitively indicates the water temperature and flow. When the lights are red the water is heating up, blue it's cooling down and when they are white and steady, that's HiQu's advanced digital processor telling you that your ideal shower is ready. So step in, relax, and enjoy the perfection your HiQu Digital Shower has to offer.

Whether you choose a HiQu Shower or a HiQu Digital Divert system, with the neat remote control you can enjoy the convenience of setting your shower running from outside the enclosure. The Digital Divert system offers the added bonus of allowing you to choose between two outlets to commence showering or begin filling a perfect bath.

See pages 45, 46 and 47 for configuration details, codes and prices.

## HIQU™ BATH

Indulge yourself in a truly sophisticated bathing experience at the touch of a button, and without a tap in sight.

Select full, half or shallow fill – and HiQu Bath will fill your tub to the depth and precise temperature you choose. The intuitive lighting display will tell you when the water is flowing at your specified temperature. And HiQu will safely stop filling your bath when your chosen depth has been reached, so you can just ‘fill and forget’.

If you fancy soaking a little longer, go ahead and indulge yourself with HiQu’s Top Up function. It can add more hot water to bring a cooling bath back to perfection. HiQu Bath Divert can be accessorised with your choice of stylish hand showers for a totally co-ordinated bathroom.

For family bathrooms, place a HiQu Shower divert system over the bath and team with a bath fill, so that at the touch of a button you can effortlessly switch between the bath fill and shower.

See pages 47 and 48 for configuration details, codes and prices.

## HIQUXT™

HiQuXT is a thermostatic shower and bath shower mixer range that combines timelessly stylish looks with an exceptional showering experience. From its luxurious all-metal chrome finished controls to its sleek lines and architectural details, HiQuXT will have pride of place in any bathroom.

With HiQuXT you will enjoy a powerful, invigorating shower every time. Just team it with your choice of Options shower head. For low pressure gravity water systems just add an Ultimate 340 Pump to deliver a satisfying, drench-like showering experience.

But HiQuXT delivers more than just high-performance showering with precise temperature control, it also comes with a host of thoughtful features. Like the Eco Flow control for a more sustainable but no less sensational shower and a temperature override button for safety and peace of mind.

The HiQuXT bath shower mixer features an integrated diverter that lets you switch seamlessly between bathing and showering, and can be bath or wall mounted, making HiQuXT an elegant and ergonomic choice for any bathroom space, large or small, new or refurbished.

See page 48 for configuration details, codes and prices.

## FUTORI™

Don't let the chic, sleek looks of the futori twin-head mixer shower fool you into thinking this is all about sophisticated appearances. There's more than enough practical substance to go with futori's undeniable style, so you'll enjoy nothing less than an impressive showering experience, whichever head you are using.

The discreet, integrated diverter allows you to customise futori with your choice of drencher shower head and hand shower, which you can seamlessly switch between for your own personalised futori shower experience. And when you want to keep your hair dry, futori's drencher head arm swivels aside to make sure it stays that way.

The thermostatic technology at the heart of futori delivers perfect water temperature and flow to your shower head. And for added reassurance, there's a temperature override button to ensure safe family showering.

With its luxurious brass controls, everything about futori exudes quality and superior attention to detail. Of course, as with all our other ranges you're free to tailor futori with your choice of accessories from the Options range to create the cool, classic bathroom style you prefer.

futori is suitable for high pressure, combination boiler, and boosted gravity water systems. And, like all the showers in the Aqualisa Premier Collection, it comes with a 5 year guarantee for your peace of mind.

See page 49 for configuration details, codes and prices.

# Using your Premier Collection shower or bath fill

Innovation, simplicity and luxury are at the heart of Aqualisa’s technology and design choices for the Aqualisa Premier Collection. Two distinct technologies combined with the best our engineering can offer means our shower and bath fills will never fail to please. Elegant styling, intuitive controls and precision flow and thermostatic control set our digital showers apart. Whilst architectural lines, thoughtful user features and thermostatic reliability make our HiQuXT and futori mixers stand out from the crowd.

## ilux Shower and ilux Shower Divert

The ilux Shower and ilux Shower Divert controls are intuitive and simple to use. These easy to follow guidelines mean you can have your ilux shower system programmed and up and running in no time at all.

- 1 **Start/Stop button (ilux Shower)** – Push to start and stop, it will default to the flow and temperature of the last shower taken.  
**Start/Stop and Divert button (ilux Shower Divert)** – Push to start and stop, it will default to the preferred outlet at the flow and temperature of the last shower taken. Push and hold and the flow will divert to the alternative outlet.
- 2 **Temperature control** – Turn right or left to adjust temperature. Sophisticated LED lighting display shows water heating up, cooling down and when it has reached temperature.
- 3 **Pre-set buttons** – Push to select desired shower or bath or to programme your shower. The LED light confirms the pre-set has been selected. ilux Divert will also remember the outlet. Pre-set buttons are numbered 1, 2, 3 and 4.
- 4 **Flow control** – Turn right or left to increase or decrease. LED lights show how high or low the flow is. A green LED will illuminate when 'eco flow' has been reached.
- 5 **Pause button** – Push to pause flow during a shower – so you can lather hair or shave.

ilux Shower Divert controller shown

## ilux Shower Remote Control

The ilux Shower Remote Control is wireless and sits in a neat 'holster' which can be located wherever is convenient. It 'pairs' with the controller it is to be used with and will not work with others. You can carry it with you and it will work up to 10m from the control, so you can start your shower without getting wet.

- 1 **Start/Stop button** – Push to start or stop the water flowing. Divert version will default to the preferred outlet set at installation and will operate at the flow and temperature of the last shower taken. Press and hold to divert to alternative outlet if used with an ilux Divert shower.
- 2 **Pre-set buttons** – Push to start with programmed flow and temperature for shower and relevant shower head with ilux Shower Divert. Pre-set buttons are numbered 1, 2, 3 and 4.

ilux Shower Remote Control

## Programming ilux Shower and ilux Shower Divert

ilux Digital Shower offers four simple pre-programmable showering options, providing flow and temperature memory to give you the perfect shower every time.

In addition to remembering the pre-set flow and temperature, ilux Digital Shower Divert will also remember the preferred shower head or bath fill at the touch of a button.

## ilux Bath and ilux Bath Divert

The simplicity of ilux Bath and ilux Bath Divert means you can create and enjoy your perfect bath at the touch of a button.

ilux Bath Divert controller shown

- 1 **Start/Stop button (ilux Bath)** – Push to start and stop, it will default to the flow and temperature of the last bath taken.  
**Start/Stop and Divert button (ilux Bath Divert)** – Push to start and stop, it will default to the preferred outlet at the flow and temperature of the last bath taken. Push and hold and the flow will divert to the alternative outlet.
- 2 **Temperature control** – Turn right or left to adjust temperature. Sophisticated LED lighting display shows water heating up, cooling down and when it has reached temperature.
- 3 **Pre-set buttons** – Push to select desired bath or to programme your bath fill. The LED light confirms the pre-set has been selected. ilux Divert will also remember the outlet. Pre-set buttons are numbered 1, 2 and 3.
- 4 **Flow control** – Turn right or left to increase or decrease. LED lights show how high or low the flow is. A green LED will illuminate when 'eco flow' has been reached.
- 5 **Safety-lock/Unlock buttons** – ensures that 'little hands' can't adjust the temperature or flow if unsupervised.

## ilux Bath Remote Control

Like ilux Shower Remote Control, the ilux Bath Remote Control sits in a neat 'holster' which can be located conveniently and once paired with the controller, it will not work with others. You can carry it with you and it will work up to 10m from the control, so you could even start your bath filling from the comfort of your bed. Plus, it is water resistant so it will work in steamy environments. If it accidentally falls into the bath it will float to the surface.

- 1 **Start/Stop button** – Push to start or stop the water flowing. Divert version will default to the preferred outlet set at installation and will operate at the flow and temperature of the last bath taken. Press and hold to divert to alternative outlet if used with an ilux Bath Divert.
- 2 **Pre-set buttons** – Push to start with programmed depth and temperature (and preferred outlet with ilux Bath Divert). Pre-set buttons are numbered 1, 2 and 3.
- 3 **Hot Top Up** – Select to run hot water at the highest temperature and lowest flow into a cooling bath for a longer luxurious soak.

ilux Bath Remote Control

## Programming ilux Bath and ilux Bath Divert

ilux Digital Bath offers three simple pre-programmable bathing options, providing temperature and bath depth memory, allowing you to just 'fill and forget'.

As well as remembering the pre-set temperature and bath depth, ilux Digital Bath Divert will remember flow and the preferred outlet allowing you to dedicate a pre-set to the hand shower if required.

HiQu Shower and HiQu Shower Divert

HiQu Digital is as elegant as it is simple to use, whether you choose a HiQu Digital Shower or a HiQu Digital Shower Divert. Its intuitive, sophisticated lighting and simple controls make it the perfect choice for both classic and contemporary bathrooms.

- ① **Start/Stop button (HiQu Shower)** – Press button to start. Water will dispense at the flow and temperature set by the controls.  
**Start/Stop and Divert button (HiQu Shower Divert)** – Press button to start. Water will dispense to the preferred outlet at the flow and temperature set by the controls. Push and hold and the flow will divert to the alternative outlet.
- ② **Temperature** – For warmer water move lever to the right, cooler to the left.
- ③ **Flow control** – For higher flow move water flow lever to the right, for lower flow to the left.
- ④ **LED Display**  
**Temperature increasing**  
Light is red and it spins clockwise.  
**Temperature decreasing**  
Light is blue and it spins anti-clockwise.  
**Flow increasing**  
Light is white and spins clockwise.  
**Flow decreasing**  
Light is white and spins anti-clockwise.  
**Flow and Temperature reached**  
Light is static white.  
**Divert selected**  
Light will give one purple flash.

HiQu Shower/Bath Divert controller shown

HiQu Remote Control

- ① **Start/Stop** – Press button to start or stop.  
**Divert button (Divert systems only)** – Push and hold and the flow will divert to the alternative outlet.
- ② **LED Display**  
**Start/Stop**  
Flashes white until selected flow and temperature have been reached then light remains on solid.  
**Divert**  
LED will ‘blink’ once to confirm divert.

HiQu Remote Control

HiQu Bath and HiQu Bath Divert

The stylish design, elegance and simplicity of HiQu Bath, whether you choose the bath only or Divert version, means your perfect bath is always available at the touch of a button.

HiQu Digital Bath Divert controller shown

- ① **Start/Stop button (HiQu Bath)** – Press button to start. Water will dispense at the temperature and depth level set by the controls.  
**Start/Stop and Divert button (HiQu Bath Divert)** – Press button to start. Water will dispense to the preferred outlet at the flow and temperature set by the controls. Push and hold and the flow will divert to the alternative outlet.
- ② **Temperature** – For warmer water move lever to the right, cooler to the left.
- ③ **Bath depth setting** – Three depth settings: shallow fill, half fill, full fill. Plus Top Up and Set Up modes.
- ④ **LED Display Temperature increasing**  
Light is red and it spins clockwise.  
**Temperature decreasing**  
Light is blue and it spins anti-clockwise.  
**Divert selected**  
Light will give one purple flash.  
**Bath Set Up/Programming mode**  
Light turns pink while programming in Bath Set Up mode.  
**Pre-set filling mode**  
Light flashes white during bath fill.

Programming HiQu Digital Bath

Press the Start/Stop button to start the water flowing. Select ‘Bath Set Up mode’, put in the plug and press and hold the Start/Stop button until the LED flashes purple. When the water has reached the depth you desire for a full fill, press Start/Stop again and the controller will remember the depth you have chosen. It will also automatically convert this into shallow fill and half fill depths. All you have to do is decide how hot or cool you want your bath, select the bath depth and press ‘Start’ for a perfect bathtime.

# HiQuXT

## HiQuXT Shower

Simple and stylishly designed, HiQuXT is what you come to expect from Aqualisa. Precise water and temperature control, easy to use controls and thoughtful features like an ‘eco-stop’ control that reduces water use by up to 50% without compromising performance, a factory set temperature control and a temperature override button, mean that HiQuXT offers everything you need to make your modern bathroom complete.

## HiQuXT Bath/Shower Mixer

Bathing and showering just got more enjoyable thanks to the HiQuXT Bath Shower Divert. The divert system allows you to switch between water flowing from the spout to the shower head. No hassle and no fiddling with taps. Just pure, simple enjoyable bathing.

### Using HiQuXT Shower and Bath/Shower Mixer

- ① **Eco-stop button** – reduces flow by 50%.
- ② **Flow control** – twist to increase or decrease flow.
- ③ **Temperature control** – twist to increase or decrease temperature as required.
- ④ **Temperature override button** – set at 38°C for safer showering – can be adjusted to suit local conditions.
- ⑤ **Deck mounted fittings** (wall mounts also available).
- ⑥ **Integrated diverter** – lift and twist to lock and unlock.

# futori

Combining luxurious styling with functionality and performance, a futori shower never fails to please. A built-in diverter allows you to switch from the fixed shower head to a hand shower, which sits neatly in the adjustable handset holder. Built from solid brass, the temperature control will stop at 38°C for safer family showering. But a temperature override button allows you to choose a hotter shower if necessary.

- ① **Fixed head arm**  
Rotates 180°.
- ② **Luxurious, solid brass control**
- ③ **Built-in diverter**  
Can be used to select fixed head or adjustable hand shower.
- ④ **Adjustable handset holder**  
Glides smoothly to required height with minimum effort.
- ⑤ **Temperature override button**  
Set at 38°C for safer showering. Can be adjusted to your preference.
- ⑥ **Temperature control**

# Digital Processors

Powered by Aqualisa’s award-winning digital technology, ilux and HiQu Digital are controlled by a compact processor box. The correct processor solution will be determined by the water system in your home. This small but powerful device blends the hot and cold water and controls the flow with digital precision to exactly the flow and temperature selected, regardless of the external temperature or conditions. It can be located up to 10 metres away from the bathing area, in the loft, airing cupboard or under the bath and delivers the perfect bath or shower every time.

Digital processors also benefit from Aqualisa’s 5 year manufacturer’s guarantee.

## High Pressure/Combi Digital processor

This digital processor, which is no larger than a shoe box, is for use with high pressure water systems which can include a combination boiler or mains fed water. It can also be teamed with an Ultimate 340 Pump for low pressure or gravity systems requiring a powerful boost.

## Gravity Pumped Digital processor with integral pump

Suitable for homes with low pressure gravity fed water systems. This digital processor integrates a pump to provide extra power.

+

## Ultimate Gravity System

For optimum power on a gravity water system, the Ultimate 340 Pump\* will provide the extra pressure needed when teamed with a High Pressure/Combi processor.

\*Ultimate 340 Pump comes with a 3 year guarantee – compatible with gravity water systems only. Suitable for use with single outlet digital products only. A suitable universal pump (works on both positive and negative head conditions) will be required for use with digital divert products.

# Choose. Explore. Create.

At Aqualisa we believe that the perfect shower experience doesn't come out of a box, because it is unique to each individual. That's why we have designed our range of showers and accessories to encourage you to immerse yourself in the experience of exploration and creation.

Here's how to design your own individually tailored water experience, step by simple step. Start with the shower 'engine' itself. Will it be one of our Digital Showers – ilux or HiQu? Or a thermostatic shower option – HiQuXT or futori?

Once you've selected the shower that offers the performance and functionality you want, you can choose to make it the heart of a single or dual outlet system.

For instance, you could simply have a single, fixed shower head. Or alternatively, if you choose the Divert version it's easy to add a bath filler, adjustable shower head or handset. A Digital Diverter will then allow you to switch instantly between outlets with one touch.

And once you're happy with how your shower is going to work, you're ready for the enjoyable task of choosing exactly how it is going to look.

All the Aqualisa shower ranges contained in this brochure come with Options. Options is a comprehensive range of high quality accessories, including: drencher heads, shower arms, shower heads, hand showers, rail systems and bath fills.

Think of it as a modular system that allows you to build or customise your Aqualisa shower or bath fill to perfectly suit your bathroom, your taste and your lifestyle.

As stylish as you desire. As luxurious as you deserve. And as unique as you are.

## How to build your Premier Collection system

### Building a typical Digital shower system

### Building a typical HiQuXT shower or bath shower mixer system

### Building a typical Digital bath system

### Building a typical futori shower system

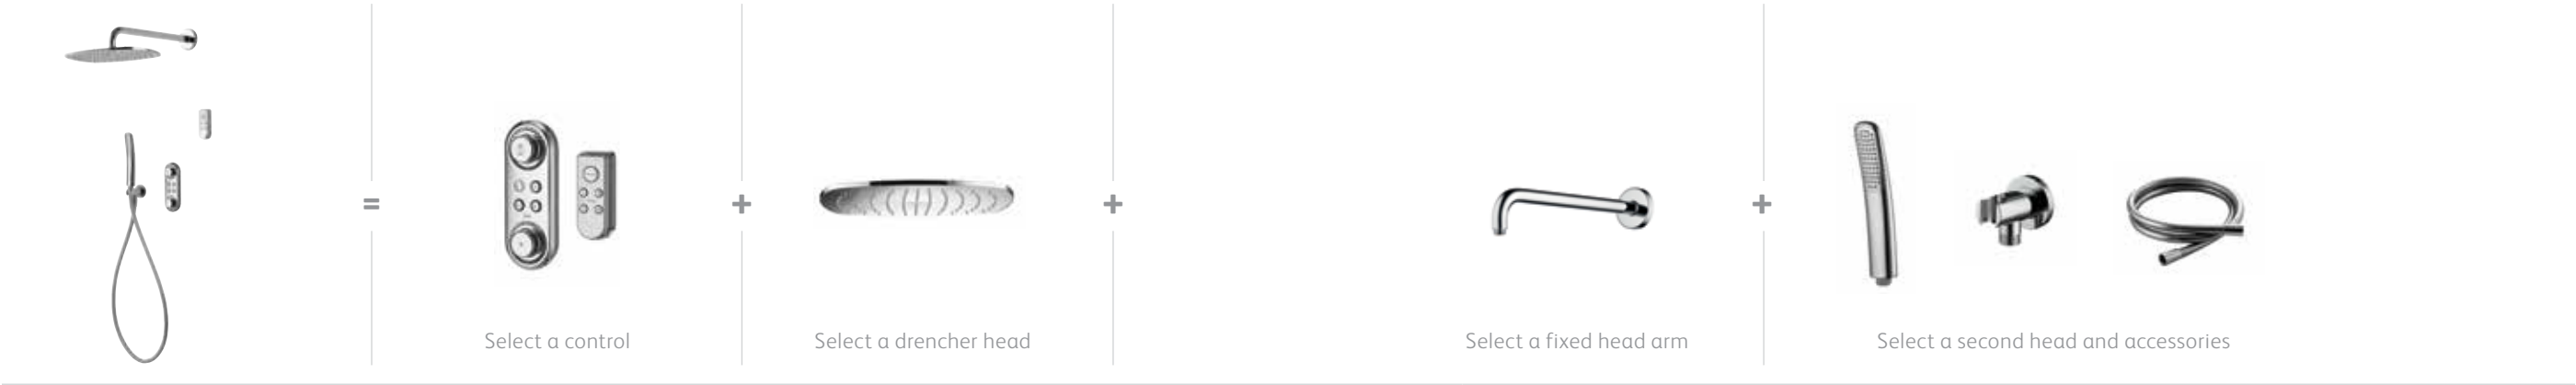

These systems are examples only. To create your perfect system, select from our full range of controls, shower heads and accessories on pages 32-41.

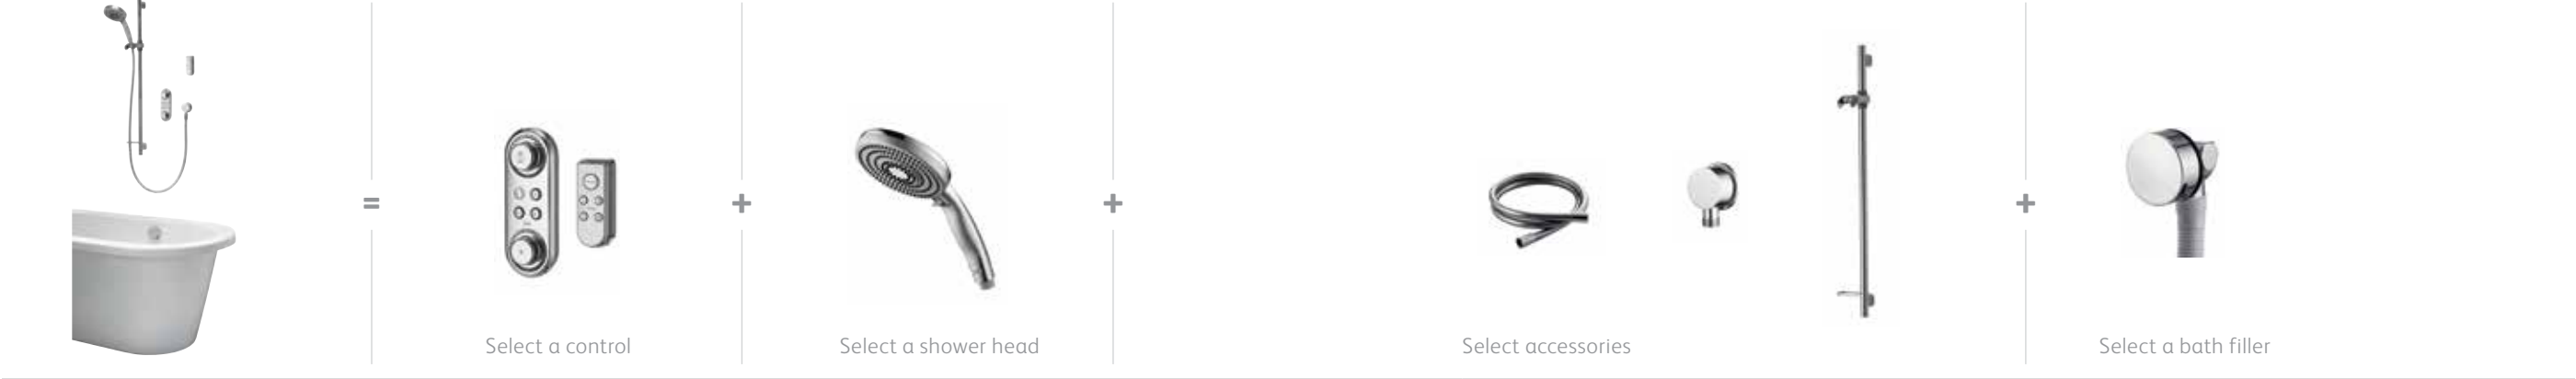

# Choose. Explore. Create.

Make the most of your ilux or HiQu Digital bathroom by selecting the Divert version which gives you two showering or bathing outlets to choose from. Accessorise with the Options range and you will create a bespoke shower or bath fill configuration to suit your décor and lifestyle.

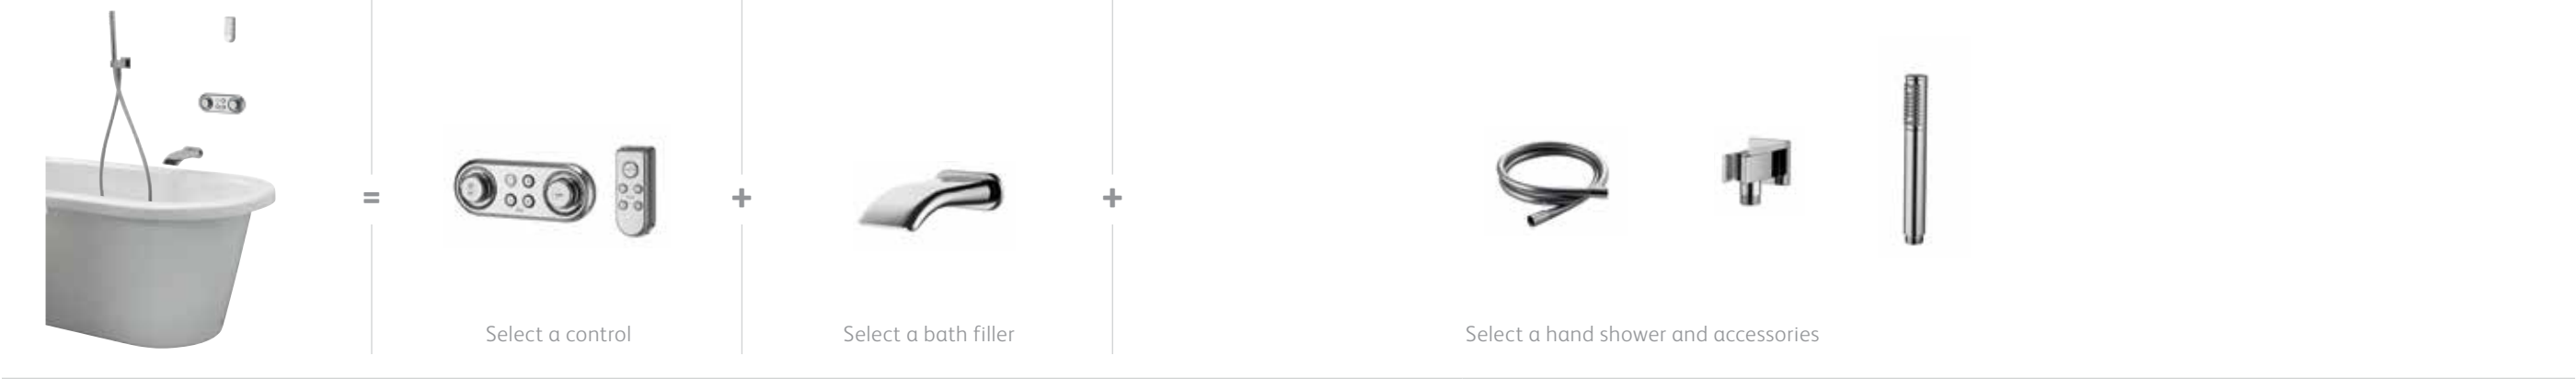

## Building a typical Digital Divert shower system

## Building a typical Digital Divert over bath shower system

## Building a typical Digital Divert bath system

These systems are examples only.  
To create your perfect system, select from our full range of controls, shower heads and accessories on pages 32-41.
