

A low-angle, upward-looking photograph of a woman in a shower. She is positioned in the center, looking up towards the ceiling. The shower walls are covered in large, rectangular, light-colored tiles with dark grout. A chrome shower arm extends from the wall, holding a large, circular showerhead. The woman's long, light-colored hair is visible. The lighting is soft and even, highlighting the textures of the tiles and the woman's skin.

AQUALISA

Rise[®]

Showers made with you in mind

As simple as water itself.

There are times when showering and bathing should be relaxing and indulgent. There are times when it should be refreshing and invigorating. One thing it should always be is effortless. From its one touch controls to its sleek modern design, everything about Rise is elegant, intelligent... and beautifully simple.

Welcome to a world of effortless luxury.

Luxuriate in the elegant simplicity of digital showering. Set the shower running with one touch, without reaching into the enclosure. Let the illuminated display tell you when the water has safely reached your preferred temperature.

A clever feature of Rise Digital Divert is that if you wish, you can programme it to deliver at an increased flow from one outlet, such as the drencher shower head (as in the configuration above), giving you a real deluge, in contrast to a lower flow for your hand shower.

Simple one-touch showering.

Rise Digital showers put the perfect shower at your fingertips. Simply set your preferred temperature and press the button. Keeping an eye on the LED display, a subtle flashing light means your shower is warming up. When the display stays on, it's time to step in. For complete convenience, add a remote control and activate your shower from up to 10 metres away.

See page 18 for product codes, prices and dimensions

Rise Digital showers

Rise is for everyone and every bathroom. Whether a replacement shower or a complete refurbishment, there is a shower to suit. The simplest, quickest and least disruptive option is an exposed version which has the controller mounted onto the riser rail and feeds perfectly blended water to the shower head directly from the ceiling.

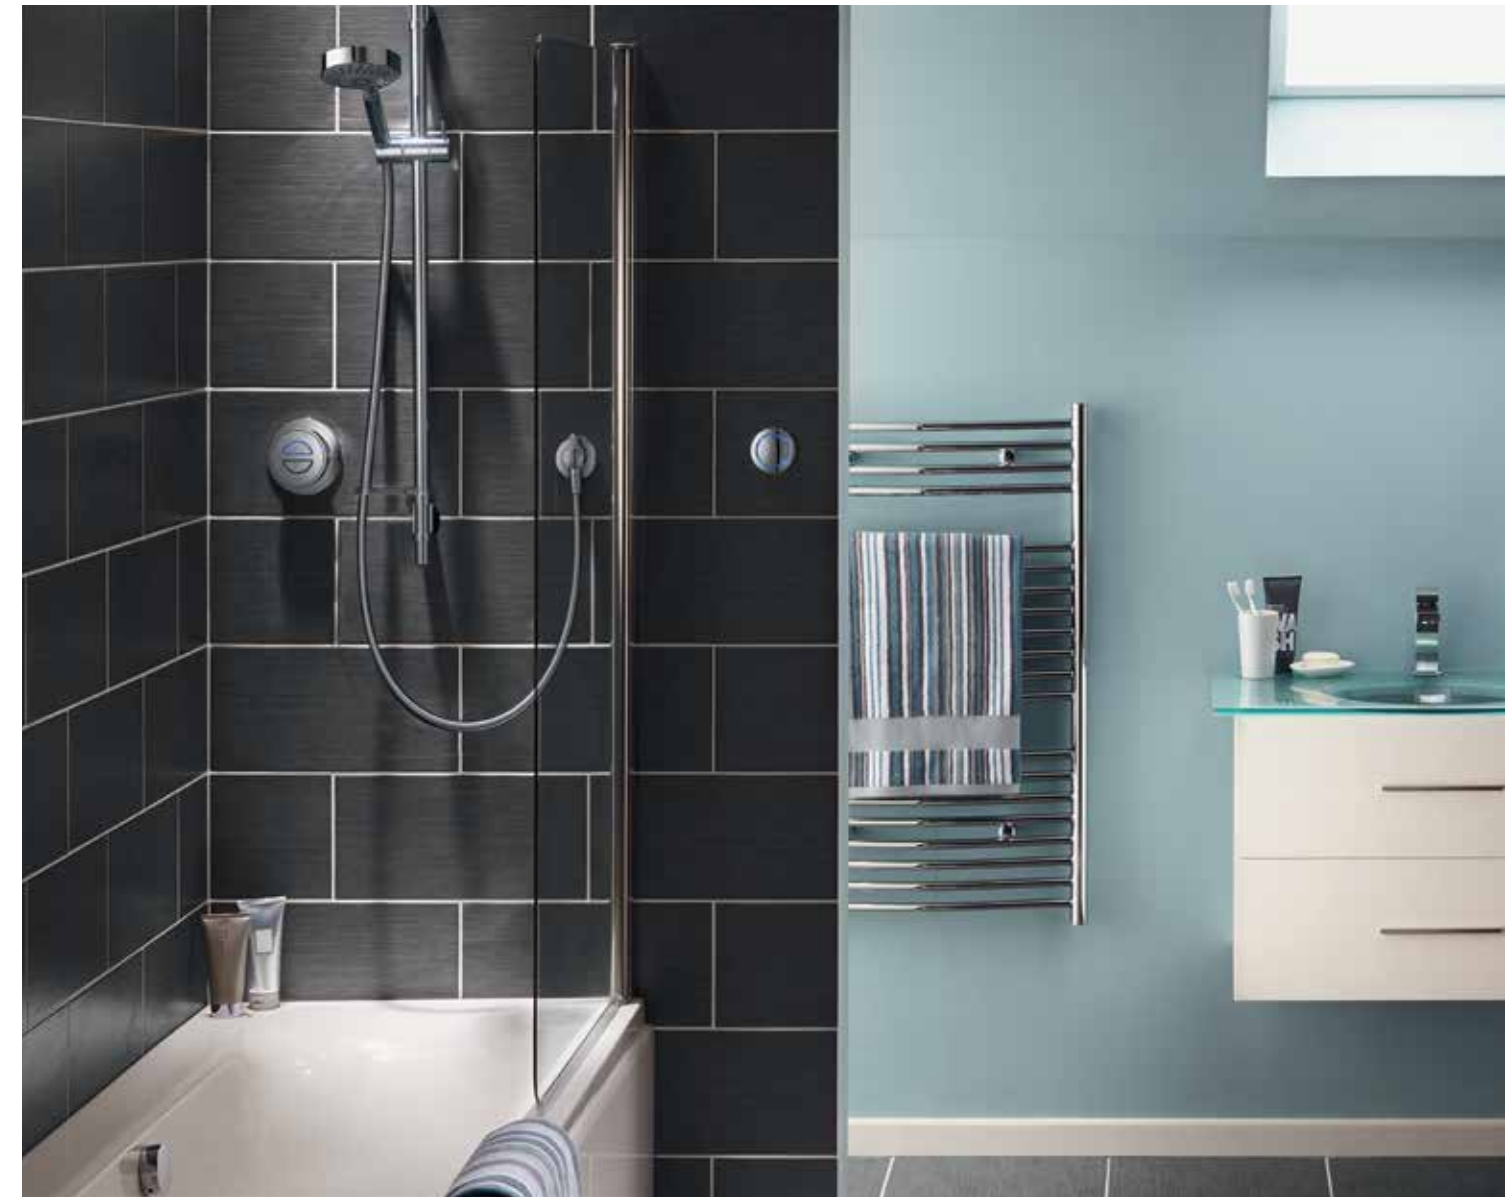

To enjoy your Rise Digital shower to the maximum just select a spray pattern to suit your mood, choose from an invigorating massage or a relaxing spray to unwind.

One touch, one great shower. Rise Digital showers offer simplicity, great showering experience and above all, the reassurance that comes from intelligent digital showering technology. Opt for the luxury of a remote control and you never need to experience that blast of cold water when you reach in to turn on your shower.

Switch on remotely with Rise, choosing between the drencher head and height adjustable shower head.

You can programme this version to increase the flow rate from the bath outlet so you can fill your bath more quickly.

Perfection. At the touch of a button.

Whether it's a sixty second shower before the morning rush hour, a long hot shower or an indulgent soak at the end of the day, choosing a Rise Digital Divert shower means that just about anything is possible.

Rise divert showers feature the latest digital diverter technology. At the touch of a button, switch from the rejuvenating jets of the adjustable height shower to the relaxing rainfall of the drencher shower head. Alternatively, if you install a shower over a bath, divert from the Rise shower head of your choice to a sleek Rise bath fill at the touch of a button.

Choose your preferred Rise Digital Divert system and accessorise to suit – the choice is yours.

Rise Digital Divert showers

Stylish, yet versatile, Rise Digital Divert showers enable you to enjoy the best of both worlds, and to switch between them whenever you wish. Shower and bath fill pairings are ideal for families. A drencher head and hand shower combination is the ultimate bathroom dream team.

See pages 19, 20 and 21 for product codes, prices and dimensions

Blissful bathing...
delivered just as you want it

Belying its understated styling, a Rise Digital bath fill will cleverly deliver perfect, thermostatically blended water through the contemporary overflow filler – making bulky taps a thing of the past. Simply touch the button – or press the Rise remote control – and your bath will be running.

Alternatively, choose a Rise Digital Bath with diverter to combine a bath fill with a simple hand shower. The ultimate in bathing luxury.

Family flexibility and functionality

Washing the kids' hair, swishing down the last of the soap suds or even an impromptu shampoo for the family pet... Busy life means that bathrooms demand flexibility. And when it comes to bath fills, a Rise Digital Divert will do it all.

The addition of a stylish, slim hand shower to your Rise bath fill allows essential versatility. Switch between the bath fill and hand shower at the touch of a button. Retain thermostatically controlled temperatures whether you're bathing or showering – and simply park the hand shower in a convenient location when it's not needed.

Rise Digital Bath

Rise Digital Bath allows you to programme your bath depth so that you have the same perfectly filled bath every time, and if your hot water runs out, it will simply stop. For longer soaks, a 'Top up' button will restore the temperature of your tub and throughout, you can be assured your Rise control will stay 'cool to touch'. Essential for safe bathing and family bathrooms.

Rise Digital Bath with diverter

A Rise bath fill combined with a simple hand shower will take care of every bathing scenario. One touch will have your bath running in minutes; push the lower button and divert to the hand shower, and you can easily rinse your hair. Temperatures will remain reassuringly safe and constant throughout.

See page 21 for product codes, prices and dimensions

Perfectly blended bath water is delivered via a sleek and stylish overflow filler, to your chosen depth and temperature – every time. And for the final indulgence, you can 'Top-up' for a longer more luxurious soak.

Rise fits into your life. Simply.

Pioneered by Aqualisa, digital showering and bathing technology is one of the biggest bathroom innovations of recent times. A digital shower or bath is controlled by a compact processor that blends flows of hot and cold water to absolute precision. Around the size of a shoebox, the processor is sited conveniently up to 10 metres away from the showering or bathing area (in the loft, airing cupboard or under the bath) freeing up space in your bathroom – often meaning a much easier installation and minimal disruption to bathroom décor.

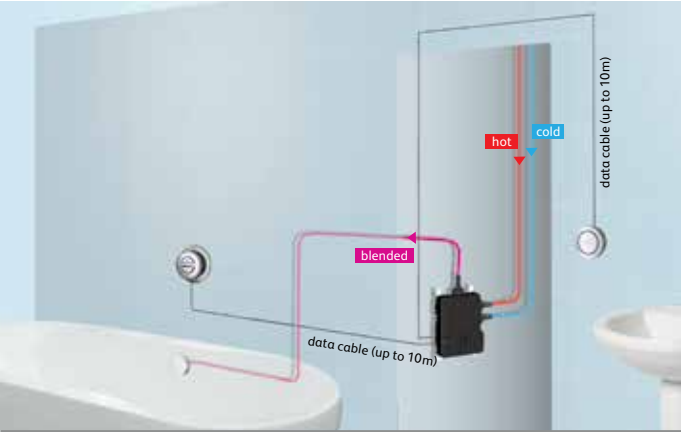

Rise Digital Divert bath fill with hand shower

- Suits any home**
 Aqualisa’s award-winning processors are compatible with gravity-fed and high pressure plumbing systems. The gravity version is given a helping hand with a quiet, integral pump.
- Simple installation**
 The Rise shower or bath control communicates with the processor via a discreet data cable. All that is required to deliver precision blended water to each shower head or bath fill is a single pipe. And as the diverter is also digital there is no need for complicated, additional plumbing work – from a single button, one touch is all it takes to turn the system on.
- Go ‘eco’**
 What’s more, the ‘eco mode’ in the processor box can be programmed for water efficient functionality and uses up to 33% less water – what could be greener?
- Guarantees**
 Rise controllers come with a 5 year parts and labour guarantee, accessories are guaranteed for 2 years.

Rise Digital installations explained

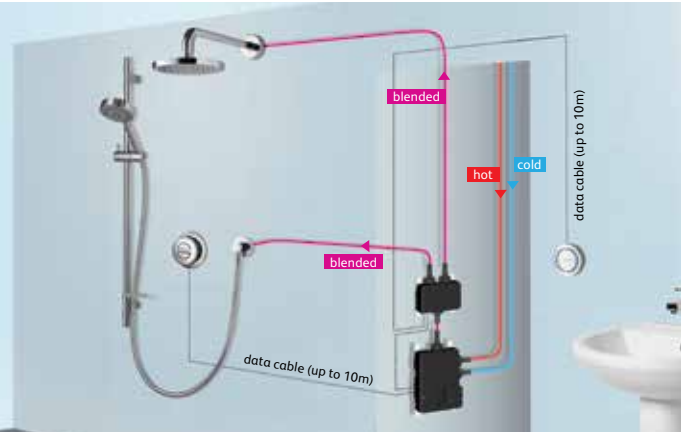

Adjustable shower
 Locate the remote control outside the enclosure – press the button and wait for the illuminated controls to stop flashing, and the shower will be ready by the time you’ve brushed your teeth.

Bath overflow filler
 Press the Start/Stop button, select your temperature, put in the plug and the bath will know when to stop filling. Why not ‘Top-up’ for a luxurious long soak.

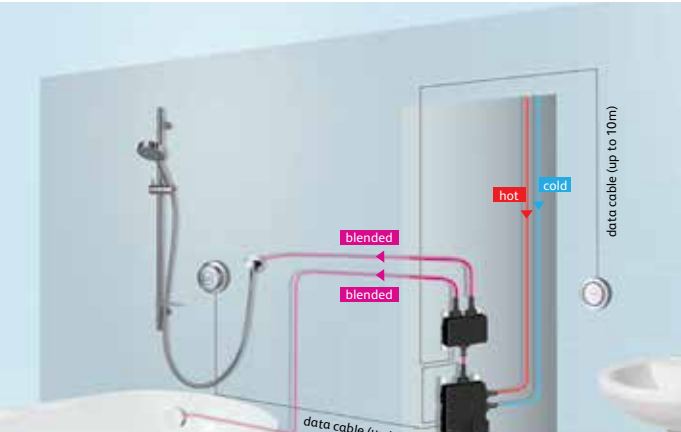

Rise Digital Divert installations explained

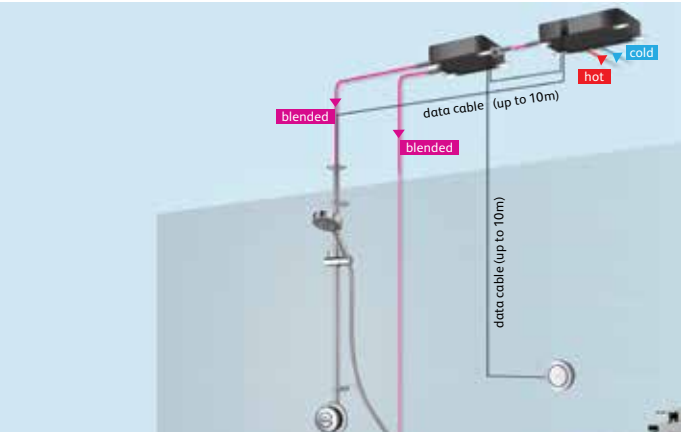

Adjustable shower and wall mounted drencher head
 Dispenses perfectly blended water to either outlet as required – you can programme your favourite one to start first every time.

Bath overflow filler divert with hand shower
 Programme the bath to dispense water at high flow to save time. Teamed with a slim hand shower, you’ll have the perfect bathing configuration.

Adjustable shower with bath overflow filler
 A shower over a bath is an ideal combination for homes without the additional space for an enclosure and a bath. Press the remote control once to operate the shower. Alternatively, press and hold the remote control if you want to fill the bath.

Exposed shower with bath overflow filler
 For a simple installation, choose an exposed system which delivers water to the shower head through the ceiling and can be installed with minimal disruption to the bathroom – combine with a bath fill for the perfect configuration.

Rise: perfect control

Perfect control

Rise is about precision made easy. To select your preferred temperature, simply adjust the 'smooth glide' outer ring of the shower or bath fill control. Then, just keep an eye on the LED display that lets you know when it is time to shower or bathe. When the display changes from flashing to steady, it's time to step in.

All our Rise Digital controllers are 'cool to touch', so there will be no surprises in store if you need to switch outlets or change the temperature while showering or bathing.

Programming Rise Digital Divert

The flow rate on your Rise Digital Divert system will be set to 'Normal' when you receive it. However, if you wish to adjust one or both outlets to flow at the higher flow rate, to suit your personal needs, you can easily re-programme it.

Programming Rise Digital Bath

Rise Digital bath fills are factory set to run for 12 minutes. But, if you want a deeper or shallower bath it is simple to re-programme so that the bath fills to exactly the right depth for you.

Rise Digital Shower control

It's so easy. One push of the button and you're showering.

Rise Digital divert control

Suitable for both shower and bath systems. Press the upper button to select the primary outlet and the lower button for the secondary outlet.

Rise Digital Bath control

Press the Start/Stop button to get your bath running. Give your bath water a 'Top-up' by pressing the lower button.

Rise Digital remote control

Switch on the shower or bath fill remotely from up to 10 metres away. If you have a divert configuration push and hold to divert.

Rise Digital remote control

The new wireless remote features LED lights to show the shower is switched on. Fit with or without the wall plate, and there are no wires or cables.

Just add water

With Rise, you can shower any way you want to, anyhow, with a choice of adjustable shower head, hand shower and luxurious drencher head. All the options come with rub-clean nozzles, ensuring limescale build up is minimal.

Adjustable head

Click your way through five different spray patterns that span sensual and soothing to rejuvenating and massage.

Hand shower

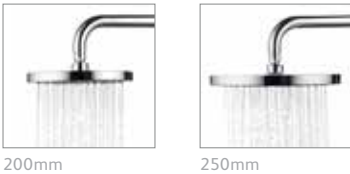

A stylish and practical addition to the Rise range. Slim, unobtrusive, yet surprisingly effective as a shower and a must-have for hair washing and bath rinsing alike.

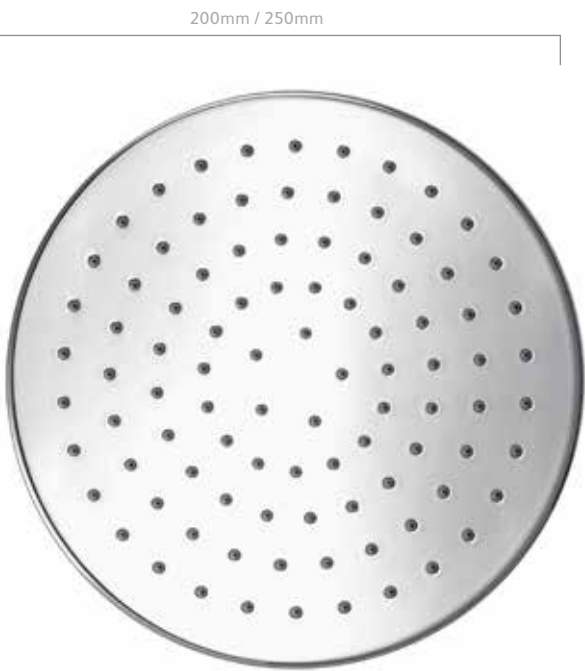

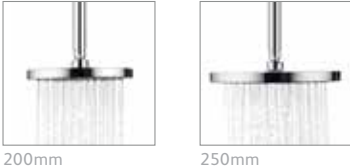

Drencher head

A cloudburst of warm, wonderfully relaxing water. Choose between a wall or ceiling fixed head and enjoy all 200mm or 250mm of indulgence and luxury.
