Dual Control

A simple rectangular design matched with tactile circular dials in contemporary chrome, this mixer offers another stylish option in the Thames range. This model features separate controls for flow and temperature and is available with an all chrome handset and riser rail.

Dual Control Diverter

With a diverter added to the flow control, you can switch between the two water outlets with the circular flow dial and create your perfect shower combination. Customise your bathroom design by selecting from the range of heads and spouts.

Nene Cool Touch

Thermostatic mixer shower

Bar Mixer

For comfortable everyday showering, there's the Nene Cool Touch - when the shower is on, the surface of the metal valve body does not get warm to the touch, unlike many conventional bar mixers. Accompanied with a three position shower head and stylish control knobs, the Nene Cool Touch is the ideal family showering solution.

Cool Touch Feature - ensures that the metal valve body does not get warm to the touch, unlike conventional bar mixer showers

Thermostatic Control - constantly regulated temperature gives the user more precise control and safer showering

Automatic Shutdown - should either the hot or cold water supplies fail

Adjustable Maximum Temperature Stop - reduces the risk of accidentally turning the temperature too high

Rub Clean Shower Head - 3 spray patterns

Nene Cool Touch Bar Mixer
Code: UNNETHBMCT

Nene Cool Touch - how does it work?

For extra reassurance

The hot supply runs across the valve before being mixed, heating the valve body - **uncomfortable if touched.**

The cold supply runs across the valve before being mixed, cooling the valve body - **pleasant if touched.**

Flow rates and the position of flow and return connections are unaffected, making the Nene Cool Touch an ideal choice for both replacement and new installations.

Nene Bar Mixer with Diverter & Body Jets

Thermostatic mixer shower

Bar Diverter

For the ultimate showering experience, this stylish, contemporary Nene bar mixer with diverter incorporates three powerful body jets and a large fixed rain shower head. An elegant chrome handset and hose provide a third showering option to enhance performance.

Thermostatic Control - constantly regulated temperature gives the user more precise control and safer showering

Diverts Water Flow - to either the fixed head, handset or body jets

Automatic Shutdown - should either the hot or cold water supplies fail

Adjustable Maximum Temperature Stop - reduces the risk of accidentally turning the temperature too high
